Information Disclosure Statement

1. The IDS filed 3/27/6 has been considered.

Specification

2. Claims 3, 6, and 10-12 are objected to because of the following informalities:

In claim 3, line 1 "the length" has no antecedent basis; claim 6, lines 1 and 2, "the bottom" has no antecedent basis, line 2, "said plurality faces" has no antecedent basis.

In claim 10, line 4, change "bottommost" to --bottom most. Appropriate correction is required.

It is suggested that applicants please check if any typographical error(s) in the specification and/or claims in response to this Office action.

3. The references of interest are cited:

Kondo (US 6,677,670 B2) discloses a flexible chip stacked assembly, comprising a plurality of chips, for example 121, 122, and 123 (see Fig. 5(a)) folded over one another and flexibility connect to one another by a bend relieving section 31; and one chip 126 mounted on a chip carrier flexibility 11 connected to the plurality of folded chips. However Kondo '670 does not literally disclose that the bend relieving section where the chips 121, 122 and 123 connected are discrete insulated interconnects. Regarding the flexibility chip stacked chip assembly, please see Kang et al. (US 7,071,547 B2), and Hashimoto (US 6,867,496 B1).

Conclusion

4. This application is in condition for allowance except for the following formal matters:

Please see paragraphs 2 and 3 above.

Prosecution on the merits is closed in accordance with the practice under *Ex* parte Quayle, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO**MONTHS from the mailing date of this letter.
